

Only smart people can read this.

I couldn't believe that I could actually understand what I was reading. The phenomenal power of the human mind, according to a research at Cambridge University, it doesn't matter in what order the letters in a word are, the only important thing is that the first and last letter be in the right place. The rest can be a total mess and you can still read it without a problem.

This is because the human mind does not read every letter by itself, but the word as a whole. Amazing huh? yeah and I always thought spelling was important!
